

SOL[★]UMBRA
Luxury outdoor living

TRANSFORM

Your outdoor space

Our new SOL*Umbra range of aluminium pergolas allows you to enjoy outdoor space all year round, regardless of the weather. With an elegant, minimalist design, SOL*Umbra pergolas create a perfect link between indoor and outdoor living space.

Pergolas can be free standing, or attached to a façade, so are perfect for use in the garden, over a swimming pool or on a patio or deck. Uniquely, several different SOL*Umbra modules can be linked together, either lengthways or widthways, to create the perfect size and shape for your pergola for any location. So for example, a pergola with slats could be joined to one with a fixed glass roof to create a versatile outdoor space.

The SOL*Umbra roof is fully customisable, with maximum dimensions of 6m x 4.5m x 3m (L x W x H) – and so for each module.

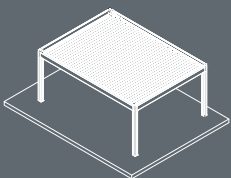

✦ *Add definition and transform your outdoor space by creating a dining area or an entertainment lounge you can enjoy throughout the year.*

✦ *Whether it's to provide much needed shade in the summer or to enjoy a starry night. Our roofing options & screen solutions have you covered.*

Blur the BOUNDARIES

The slats of the SOL*Umbra pergola can be rotated up to 120 degrees, providing optimal comfort by allowing you to fully enjoy the sun, or to create some or total shade. With a motorised system, all of the pergola's aluminium slats open and close simultaneously.

The rotating slats also enable you to completely close the roof and provide protection from rain. The water is carefully removed via an integrated gutter and invisible water drainage in the support posts. A rain or wind sensor can also be supplied, to immediately detect rainfall or wind and automatically close the slatted roof.

With a wide range of options, SOL*Umbra pergolas can be completely personalised to meet your individual requirements. Adjustable screens built into the support posts keep out wind, water and sun as well as providing privacy if required.
